Operating Instructions

Standard 1/4" mounting thread compatible with the Gravity Explorer Ballhead

1/4" Top Stud

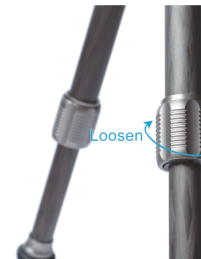

Pull out the angle lock latch to adjust the angle of the tripod legs.

Use both hex wrenches simultaneously to adjust the tightness of the legs

Rotate the leg twist lock to adjust leg section

Attach the EX-37 QR plate to the camera using a coin of flathead screwdriver

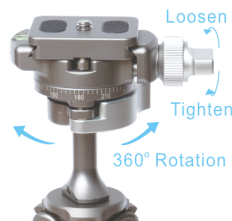

Using a coin to loosen the screw

Loosen the clamp lock-knob, insert the camera with QR plate mounted and tighten the clamp

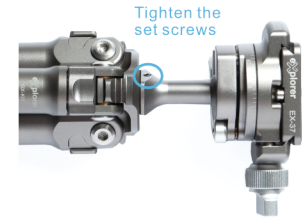

Loosen the panning base lock-knob and the head will rotate 360 degrees

Pull the ball lock lever to loosen the ball head which allows the ballhead to be repositioned at any angle including in portrait orientation.

Tighten the set screws by using the included hex wrench to secure the ballhead

Notes

- 1 - Always hold your camera or remove it from the ballhead when moving the tripod or ballhead.
- 2 - Tighten the set screw by using the included hex key.
- 3 - Do not use this product as other tool than its original purpose of design.
